JL- There is another special Tatler issue claiming the JFK assassination is solved. It appears to be another ripoff, this time pretending another interview with me and using what is not from government documents in WW IV. I have it, have not read it, and think you should get one if you can. I'll try locally for you by phone. Howard brought it to me but when he told me about it I thought it was the older one we know about. I got a call last night that let me know clearly that this is a different, new one. Not until then did I glance at it. I've not read it yet but from what I've been told I think it helps make a fair case of theft. HW 9/3/75
